REALLENS AI

FORENSIC MEDIA AUTHENTICITY & DEEPFAKE VERIFICATION REPORT

Generated: 10/16/2026, 11:21:20 PM | Report ID: b39fc044-1036-4ade-9b63-

VERDICT: SYNTHETIC / AI-GENERATED (FAKE)

Confidence Score: 94%

Synthetic artifacts or generative model patterns detected. Media shows signatures of AI manipulation.

1. EXECUTIVE SUMMARY & TAKEAWAY (NON-TECHNICAL)

The AI found signals associated with possible manipulation in this media (94% model confidence).
This is not proof of a deepfake; review the evidence and ask a person to verify it.

The model found a concerning anomaly pattern, which suggests the content may be manipulated.

2. DIGITAL ASSET PROVENANCE & FILE TELEMETRY

File Name:	ImageName.jpg
Media Modality:	UNKNOWN
Cryptographic Hash (SHA-256):	e3b0c44298fc1c149afbf4c8996fb92427ae41e4649b934ca495991b7852b855
Resolution / Dimensions:	1920x1080
Frame Rate / Duration:	N/A | Duration: N/A
Faces Detected:	Not reported

3. FORENSIC MODALITY ANALYSIS (TECHNICAL)

Modality Metric:	spatial_fake_probability, COMPLETED, included (normalized weight 0.500, contribution 0.4750)
Modality Metric:	frequency_fake_probability, COMPLETED, included (normalized weight 0.500, contribution 0.4650)
Multimodal Fusion Method:	weighted_average
Fused Fake Probability:	94.00%
Confidence Calibration:	decision-margin calibrated

4. DETECTED EVIDENCE & ARTIFACT TRAIL

Technical Summary:	AIDE does not specify how it classified this file; as FAKE at 94% model confidence. This score is derived from the combined spatial and frequency analysis.
Observed Evidence:	Spatial Neural Net - high severity - Inconsistent blending borders around jawline - Metric: 0.95

5. INPUT SIGNAL QUALITY & HARDWARE SENSOR TELEMETRY

Input Quality Status:	GOOD
Compression Indicator:	Not reported
Sensor Blur & Noise Variance:	Not reported

6. MODEL GOVERNANCE, LIMITATIONS & DISCLOSURE

Inference Engine:	AIDE (Not specified)
Processing Duration:	Not reported ms

No independently measured model-accuracy figure was supplied for this analysis. The per-file confidence score is not an accuracy percentage and does not establish that the result is correct.

The prediction is generated by a machine-learning model and should not be treated as absolute proof of authenticity or manipulation.
